Subject Index

Achievement, early identification of medical students 389
medical school, school results as predictor 381
AIDS, hepatitis B and neurological pin: correspondence 83
ALCO *see* General clerkship
Alcohol excess, history taking, teaching doctors skills 539
Alphabetical listing and sex, effects on examination performance of medical students 205
Alternative instructional media, effectiveness in physiology practical teaching 82, *abs*
'Alternative track strategy' in medical teaching: editorial 171
Anatomy, learning during lecture 88
student preferences, Nigerian medical school 412
for primary health care, and dentistry 407
Announcements 84, 167, 249, 372, 480
Anxiety level and examination performance: correspondence 247
patients', students' perception 15
Assessment, teachers' of student case reports, impact of educational interventions 113
Association for the Study of Medical Education, Annual Scientific Meeting, Birmingham, September 1987, abstracts 78; report 240
Attitudes, doctors, doctor–patient (DP) rating 231
by educators and consumers to educational priorities in mental health professions 60
medical students and comprehensive patient care 19
towards disabled people, effect of medical education 501
objective structured practical examination 40
to teaching of medical ethics 8
to social issues, medical and non-medical senior year students compared 375

Biomedical knowledge in explanations of clinical problems by medical students 398

Cardiovascular disease, criterion-referenced examination 32
Career, choice and learning style analysis 527
preferences and career outcomes, medical students, Australia 214
Casualty setting, identification of simulated patients by interns 533
Chest, examination, foam sponge as teaching aid: correspondence 554
radiographs, general practitioners training in interpreting 449
Child health, critical incident study 27
China, medical education 261
for 21st century, context for change 253
Classification, international primary care, international classification: editorial 373
Clinical competence, assessment, factor analysis as approach to criterion referencing 78, *abs*
and biomedical knowledge 398
child health 27
and comprehensive patient care, medical students 19
and problem-based learning 279
student/registrar/consultant expertise 173
examination, structured, eight years' experience 200
teaching audit of educational competence 433
Computer-assisted learning, medical schools, Britain 180
in medical education. Medical Education Booklet No. 22 455
in physiology 183
based workshops, new approach to continuing medical education 79, *abs*
role in management of dental education 55
simulation, and place of expert systems 99
Computerized diagnosis, implications for clinical education 47
Computing, medical, teaching to first-year clinical students 82, *abs*
Conferences *see* Announcements
Continuing medical education, effects on family doctor performance 139
as essential component of World Health Organization manpower development policies and strategies in the European Region: report 468
report 159
Coronary heart disease, Open University pack, reactions of Welsh general practitioners 543
Criterion-referenced examination in cardiovascular disease 32
Criterion referencing and clinical competence assessment 78, *abs*
Critical incident, study in child health 27
technique, critical look 79, abs
Curriculum, medical, evaluation 426
parallel-track, and adoption of the 'alternative track strategy': editorial 171
traditional, impact of new course 308

Decision-making, patient simulation 118
Dental education, computers, role in management 55
Dentistry and primary health care, anatomy for 407
Depression, patients', students' perception 15
Diagnosing the diagnostic process 270
Diagnosis, computerized, implications for clinical education 47

Disabled people, attitudes of medical students towards, effect of medical eduction 501
Display study boards, new aid to student learning 80, *abs*
Dissecting work, knowledge use 82, *abs*
Doctor–patient (DP) rating, measuring attitudes of doctors 231
Dr Fox effect, teaching basic science, lecture style 393
